Java

```java
class Solution {
    public long maxSum(List<Integer> nums, int m, int k) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} nums
 * @param {number} m
 * @param {number} k
 * @return {number}
 */
var maxSum = function(nums, m, k) {

};
```

C++

```cpp
class Solution {
public:
    long long maxSum(vector<int>& nums, int m, int k) {

    }
};
```

C#

```csharp
public class Solution {
    public long MaxSum(IList<int> nums, int m, int k) {

    }
}
```
